

## ABSTRACT

An absorptive product of the present invention comprises an absorptive body capable of absorbing and holding liquid and a flexible and liquid-impermeable trapping portion which temporarily traps the liquid which is 5 to be absorbed by this absorptive body. Then, the underpants comprising the fitting section to which this absorptive product is detachably fit are made. For this absorptive body, a high liquid absorbing resin of 50 to 95 weight % is used.
